

30-60-90 Day Plan – Tesla Iași · Sales Supervisor

Candidate: Sales Supervisor Iași (277071) · 8 October 2026

Three principles

- 1. **Learn Tesla's way first, then improve it.** I don't come in to change the process. I come in to execute it perfectly in a new market.
- 2. **Customers and deliveries first.** Every decision is tested against one question: does it make the customer's experience better?
- 3. **Build a team that runs without me.** Success at day 90 is a store that performs on the days I'm not there.

Days 1–30 · Learn and set the foundations

Area	What I do
Tesla	Complete onboarding and product training. Spend time at another Romanian store (Bucharest or Timișoara) to see deliveries, the daily routine and a quarter-end up close.
Team	A 1:1 with every team member: strengths, goals, what they need from me. If hiring is still open, join the interviews and hire for attitude and coachability.
Service	Meet the Service and Parts team in Brătuleni. Agree on one clear escalation path and on how a car moves from Sales to Service.
Market	Build a map of Iași: existing Tesla owners in the region, the top 20 employers (IT, medical, university), leasing companies, the local events calendar.
Routines	Start the 10-minute morning huddle and a daily funnel check from day one.

By day 30: every team member has a development goal. The market map and the launch priorities are agreed with my manager.

Days 31–60 · Launch and build demand

Area	What I do
Test drives	Weekend test-drive events, test-drive days at large employers (major local companies), invitations for existing owners and the referral program.
Financing	A short, simple guide for advisors and customers: Rabla 2026 (18,500 lei), private leasing, company purchase and company leasing. That's where many buyers here get stuck.
Deliveries	A readiness check 3 days before every delivery: payment, financing, documents, trade-in. No surprises on delivery day.
Coaching	On the floor during peak hours. I join customer conversations, then debrief for five minutes. Weekly 1:1s on numbers and development.

By day 60: a weekly test-drive rhythm is running and the first deliveries are completed with no open issues at handover.

Days 61–90 · Optimise and scale

Area	What I do
Funnel	Compare our funnel with the other Romanian stores and fix the single biggest bottleneck.
Quarter-end	Plan staffing and delivery waves weeks ahead. Pre-delivery readiness becomes the main focus in the last month of the quarter.

Area	What I do
People	Identify the future leaders and give them ownership: a financing champion, a delivery champion.
Customer feedback	With Service: the 5 questions customers ask most after delivery get answered <i>at</i> delivery.

By day 90: a team that runs the daily routine on its own, a clear plan for the first quarter-end, and at least one person on track to grow into a bigger role.

What I watch every day (the funnel)

Stage	What I look at	Why
Opportunities	New leads, walk-ins, event contacts	Is awareness working in a new market?
Test drives	Number per week, per advisor	The strongest sales tool Tesla has
Orders	Test drive → order conversion	Where coaching has the biggest effect
Readiness	% of deliveries ready 3 days before	Protects deliveries already sold
Deliveries	On time, no open issues at handover	The moment customers remember
Satisfaction	Customer feedback after delivery	Next to conversion, never instead of it

Risks I already see, and how I'd handle them

Risk	What I'd do
Tesla is new in the Moldova region	Test drives everywhere, local owners as ambassadors, presence at local events
MG and BYD compete hard on price (MG4 was the top EV in Romania in August)	Win on what the store controls: test drives, service close to home in Brătuleni, the delivery experience, total cost of ownership
Rabla dropped from 37,000 to 18,500 lei	Financing and leasing explained simply, especially for companies
A brand-new team	Structured onboarding, shadowing deliveries, a 30-day check-in for every new hire
